DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:

The product claims 1-35 and 43-48 will be examined along with the elected invention of Group I or Group II (MPEP § 806.05(i)).

- I. Claims 36-42, drawn to a method of making a lyophilized formulation of GLP-2 comprising preparing a GLP-2 formulation, freezing the formulation, and drying the formulation, classified in class 514, subclass 2.
- II. Claims 49-54, drawn to a method of treating a human or animal having a disorder or condition comprising administering a GLP-2 formulation, classified in class 514, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are different processes-one of making and one of using the product, which have different results and use different materials. The practice of the process of Group I does not require the process of Group II. Since the product does not appear allowable, restriction is proper between said method of making and method of using.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the recognized divergent subject matter, and because Inventions I and II require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

A telephone call was made to Stephen Bent on December 31, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
